Contents

1 Introduction of Piezotronics and Piezo-Phototronics 1
1.1 Beyond Moore's Law with Diversity and Multifunctionality 1
1.2 Interfacing Human with Machine 2
1.3 Piezopotential—The Fundamental Physics for Piezotronics and Piezo-Phototronics 3
1.4 Coining the Field of Piezotronics 5
1.5 Piezotronic Effect 6
1.5.1 Piezotronic Effect on Metal–Semiconductor Contact 7
1.5.2 Piezotronic Effect on p–n Junction 8
1.6 Piezo-Phototronic Effect 11
1.7 One-Dimensional Wurtzite Nanostructures for Piezotronics 12
1.8 Perspective 13
References 15

2 Piezopotential in Wurtzite Semiconductors 19
2.1 Governing Equations 20
2.2 Theory for the First Three Orders of Perturbations 21
2.3 Analytical Solution for a Vertical Nanowire 23
2.4 Piezopotential for a Transversely Deflected Nanowire 26
2.5 Probing the Piezopotential of a Transversely Deflected Nanowire . 28
2.6 Piezopotential for an Axial Strained Nanowire 29
2.7 Equilibrium Piezopotential in a Doped Semiconductive Nanowire . 32
2.7.1 Theoretical Frame 32
2.7.2 Calculated Piezopotential with Considering Doping 34
2.7.3 Effect of Doping Concentration 39
2.7.4 Effect of Carrier Type 42
2.8 Effect of Piezopotential on Local Contact Characteristics 43
2.8.1 Theoretical Analysis 43
2.8.2 Experimental Verification 46
2.9 Through-End Model for Current Transport 48
References 49

3 Basic Theory of Piezotronics 51
3.1 Piezotronic Transistor vs. Traditional Field Effect Transistor 52
3.2 Effect of Piezopotential on Metal–Semiconductor Contact 53
3.3 Effect of Piezopotential on p–n Junction 55
3.4 Theoretical Frame of the Piezotronic Effect 56
3.5 Analytical Solution for One-Dimensional Simplified Cases 58
3.5.1 Piezoelectric p–n Junctions 58
3.5.2 Metal–Semiconductor Contact 61
3.5.3 Metal–Wurtzite Semiconductor Contact 63
3.6 Numerical Simulation of Piezotronic Devices 64
3.6.1 Piezoelectric p–n Junctions 64
3.6.2 Piezoelectric Transistor 68
3.7 Summary 70
References 71

4 Piezotronic Transistors 73
4.1 Piezotronic Stain Sensor 73
4.1.1 Sensor Fabrication and Measurement 74
4.1.2 Calculation of Strain in the Piezoelectric Nanowire 75
4.1.3 Electromechanical Characterization of the Sensor 76
4.1.4 Data Analysis Using the Thermionic Emission-Diffusion Theory 77
4.1.5 Separating the Contributions Made by Piezoresistance and Piezotronic Effects 79
4.1.6 Much Enhanced Gauge Factor by Piezotronic Effect 80
4.2 Piezoelectric Diodes 81
4.2.1 Piezotronic Induced Change from Ohmic to Schottky Contact 82
4.2.2 Quantifying the Change in Schottky-Barrier Height 84
4.2.3 Mechanism of the Piezotronic Diode 87
4.2.4 Piezotronic Electromechanical Switch 87
4.3 Piezotronic Transistors Based on Vertical Nanowires 88
4.3.1 Reversely Biased Contact 88
4.3.2 Forward Biased Contact 90
4.3.3 Two-Leads Piezotronic Transistor 92
4.4 Summary 93
References 94

5 Piezotronic Logic Circuits and Operations 97
5.1 Strain-Gated Transistor 98
5.1.1 Device Fabrication 98
5.1.2 Fundamental Principle 100
5.2 Strain-Gated Invertor 101
5.3 Piezotronic Logic Operations 104
5.3.1 NAND and NOR 104
5.3.2 XOR 106

5.4 Summary . . . 108
References . . . 108

6 Piezotronic Electromechanical Memories . . . 111
6.1 Device Fabrication . . . 112
6.2 Principle of Electromechanical Memory . . . 113
6.3 Effect of Temperature on Memory Performance . . . 115
6.4 Piezotronic Effect on Electromechanical Memory . . . 119
6.5 Rewritable Electromechanical Memory . . . 122
6.6 Summary . . . 124
References . . . 124

7 Theory of Piezo-Phototronics . . . 127
7.1 Theoretical Frame of the Piezo-Phototronic Effect . . . 127
7.2 Piezo-Phototronic Effect on LED . . . 129
7.2.1 Analytical Solution for Simplified Piezoelectric LED . . . 129
7.2.2 Numerical Simulation of Piezoelectric p–n Junctions LED Devices . . . 132
7.3 Piezo-Phototronic Effect on Photosensors . . . 134
7.3.1 Current Density for a Forward Schottky Contact . . . 135
7.3.2 Current Density for a Reversely Biased Schottky Contact . 135
7.3.3 Model for Photoexcitation . . . 136
7.3.4 Equations for Piezo-Charges and Piezopotential . . . 136
7.3.5 Piezo-Phototronics Effect for a Double-Schottky-Contact Structure . . . 138
7.3.6 Numerical Simulation of MSM Photodetector . . . 139
7.4 Piezo-Phototronic Effect on Solar Cell . . . 141
7.4.1 Basic Equations . . . 143
7.4.2 Piezoelectric Solar Cell Based on p–n Junction . . . 144
7.4.3 Metal–Semiconductor Schottky Contacted Solar Cell . . . 149
7.5 Summary . . . 150
References . . . 151

8 Piezo-Phototronic Effect on Solar Cells . . . 153
8.1 Photocell of a Metal–Semiconductor Contact . . . 153
8.1.1 Experimental Method . . . 154
8.1.2 Basic Principle . . . 154
8.1.3 Optimization of Solar Cell Output . . . 156
8.1.4 Theoretical Modeling . . . 158
8.2 p–n Heterojunction Solar Cells . . . 160
8.2.1 Piezopotential on the Solar Output . . . 161
8.2.2 Piezotronic Model . . . 163
8.3 Enhanced Cu_2S/CdS Coaxial Nanowire Solar Cells . . . 165
8.3.1 Design of the Photovoltaic Device . . . 166
8.3.2 Piezo-Phototronic Effect on the Output . . . 169
8.3.3 Theoretical Model . . . 172

8.4 Solar Efficiency of Heterostructured Core-Shell Nanowires . . . 174
8.5 Summary . . . 176
References . . . 177

9 Piezo-Phototronic Effect on Photodetector . . . 179
9.1 Design of Measurement System . . . 179
9.2 Characterization of the Fabricated UV Sensor . . . 181
9.3 Piezo-Phototronic Effect on UV Sensitivity . . . 183
9.3.1 Experimental Observations . . . 183
9.3.2 Physics Model . . . 185
9.4 Piezo-Phototronic Effect on Visible Photodetector . . . 188
9.4.1 Experimental Results and Comparison with Calculation . 188
9.4.2 Effect from Piezoresistance . . . 191
9.4.3 Effect from Series Resistance . . . 191
9.5 Judging Criteria for Piezo-Phototronic Photodetection . . . 191
9.6 Summary . . . 192
References . . . 193

10 Piezo-Phototronic Effect on Light-Emitting Diode . . . 195
10.1 LED Fabrication and Measurement Method . . . 196
10.2 Characterization of LED . . . 199
10.3 Piezoelectric Effect on LED Efficiency . . . 200
10.4 Effect of Piezo-Polar Directions . . . 200
10.5 Relationship Between the Injection Current and the Applied Strain . . . 201
10.6 Emission Spectra and Excitation Processes . . . 202
10.6.1 Band Diagram of the Heterojunction . . . 202
10.6.2 Emission Spectra of a Strained LED . . . 203
10.7 Piezo-Phototronic Effect on LED . . . 204
10.7.1 Fundamental Physical Process . . . 204
10.7.2 Effect of Strain on Band Profile of the Heterojunction . . 206
10.8 Strain Effect on Photon Polarization . . . 210
10.9 Electroluminescence Properties of p-Type GaN Thin Films . . . 213
10.9.1 Piezo-Phototronic Effect on LED . . . 213
10.9.2 Theoretical Model . . . 215
10.9.3 Analysis of Emission Characteristics . . . 216
10.10 Summary . . . 220
References . . . 221

11 Piezo-Phototronic Effect on Electrochemical Processes and Energy Storage . . . 223
11.1 Basic Principle of Photoelectrochemical Process . . . 223
11.2 Piezopotential on the Photoelectrochemical Process . . . 224
11.3 Photoelectrochemical Solar Cell . . . 225
11.3.1 Design of the Cell . . . 225
11.3.2 Piezo-Phototronic Effect on PEC . . . 226

11.4 Piezopotential on Mechanical-to-Electrochemical Energy Conversion . . . 227
11.4.1 Working Principle of the Self-charging Power Cell 228
11.4.2 Design of the Self-charging Power Cell 231
11.4.3 Performance of the Self-charging Power Cell 232
11.5 Summary 235
